## World Environment Day, 5<sup>th</sup> June, 2023

On the World Environment Day which was on 5<sup>th</sup> June, 2023 students participated through google link and registered their slogans or drawings/painting or essay:

<https://tinyurl.com/Env-Day-Essay-Slogan-Painting>

We congratulate all the participants and the winners of the competition are:

1. Best Drawing: Jogi Yashnath Mohannath – B.Com Sem-2
2. Best Slogan: Memon Karima Arifbhai – B.Com Sem-2
3. Best Essay: Vishva Vadukar – B.Com Sem-2

Congratulations to Jogi Yashnath Mohannath, Memon Karima Arifbhai, and Vishva Vadukar for their outstanding contributions on World Environment Day! It's wonderful to see students actively participating and showcasing their creativity and awareness about environmental issues.

Jogi Yashnath Mohannath, a student from B.Com Sem-2, has been awarded the Best Drawing prize. Your artistic skills and ability to express environmental concerns through your drawing are truly commendable. Keep up the great work!

Memon Karima Arifbhai, also from B.Com Sem-2, has been recognized for creating the Best Slogan. Your ability to convey a powerful message concisely is impressive. Your slogan must have captured the essence of environmental conservation and inspired others to take action.

Vishva Vadukar, a student from B.Com Sem-2, has won the Best Essay award. Your essay must have been thought-provoking and well-written, providing valuable insights into environmental issues. Your efforts in raising awareness through your writing are appreciated.

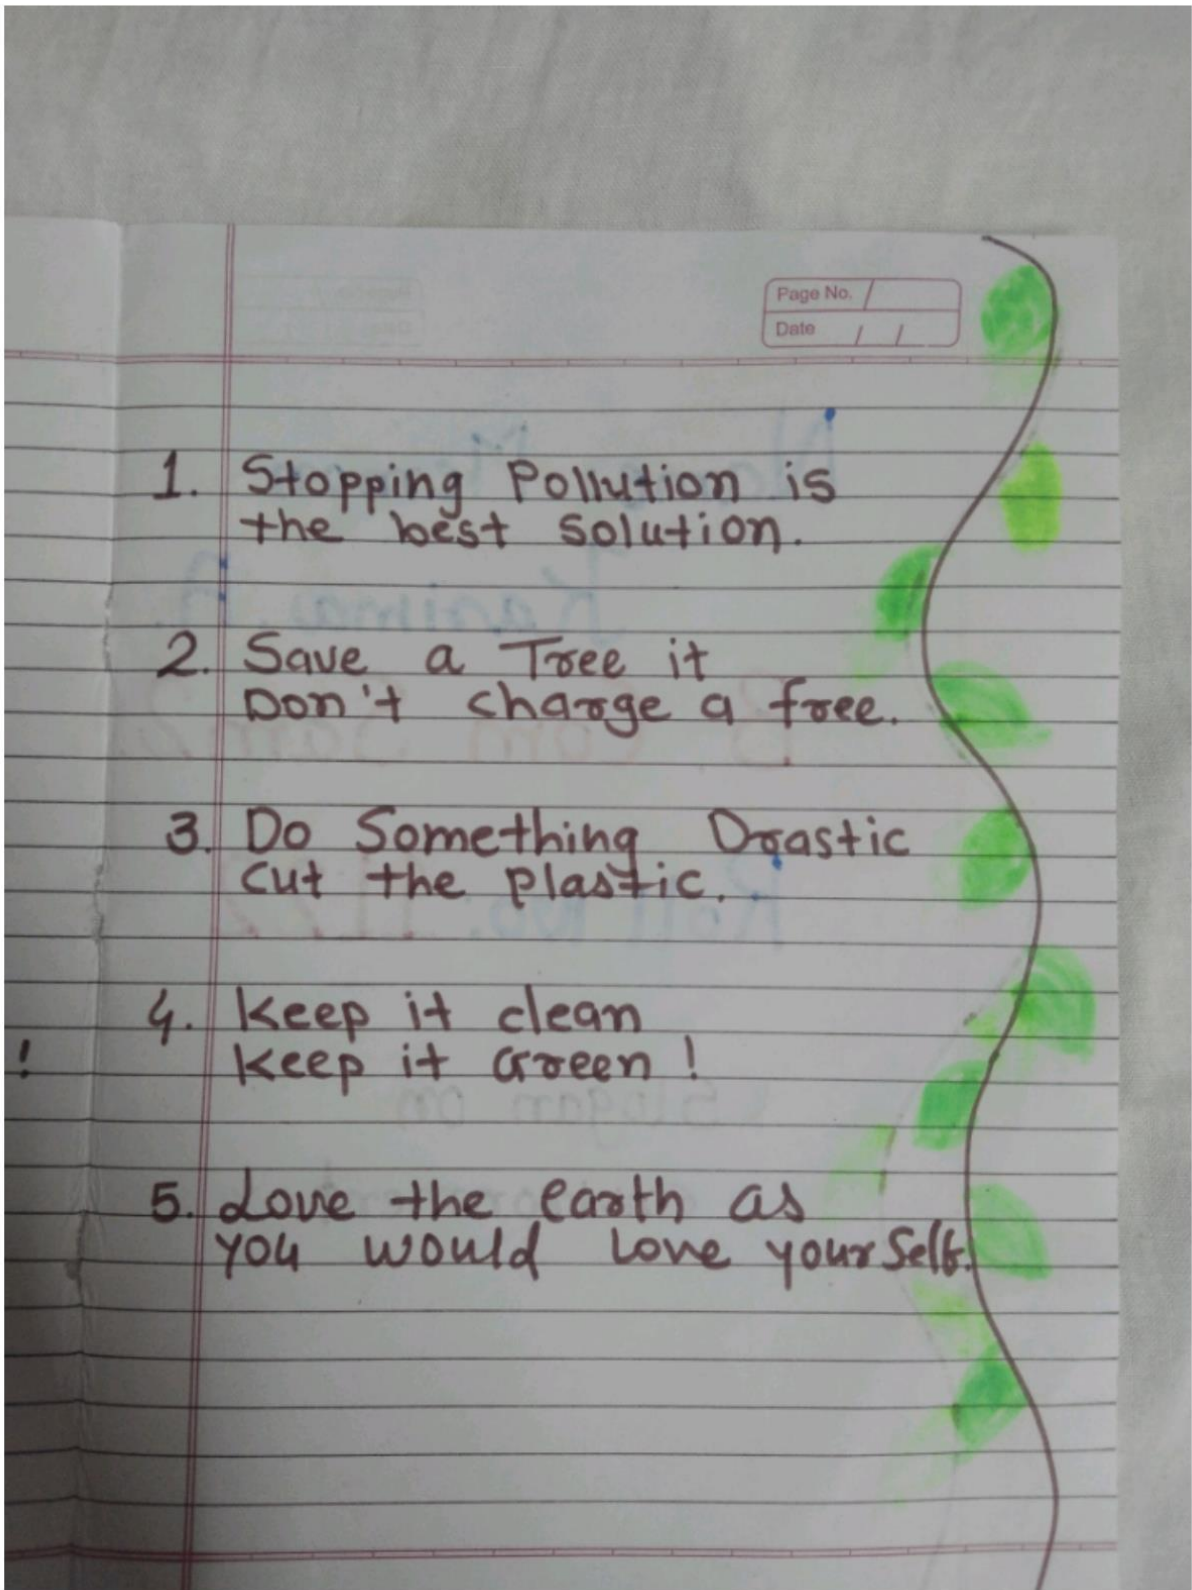

Once again, congratulations to all the participants who took part in the competition. Your active involvement demonstrates a commitment to preserving our environment and making a positive impact. Let's continue to prioritize environmental sustainability and work together towards a greener and healthier planet.

**1. Best Drawing: Jogi Yashnath Mohannath – B.Com Sem-2**

Best Slogan:

Memon Karima Arifbhai – B.Com Sem-2

6. Make every day  
Environment day

7. Don't be greedy  
it's time to greeny!

8. Deep calm &  
keep protecting the  
lungs of the plant.

9. Be the change you  
wish to see in world!

10. one plant,  
one change.

## Importance of Environmental Conservation & Sustainable Practices.

The problem of environmental protection and of sustainable development of material resources represent, at present, a common preoccupation of all the states of all the world, a global wide objective. To this end, a series of international provisions with universal vocation have been adopted by means of collaboration and co-operation among States. The international measures regarding environmental protection have been provided for, stated, or recognized at the level of international general or conventional law.

The concepts of Sustainable development has made Society conscious and in the same time recognize, the role & importance of environmental factors as well as of the functions and the services the environment provides. (Bortelmus, 1986). The Sustainable development has to be taken into consideration in establishing the line of action at the level of the whole communitarian process, establishing exigencies regarding the information about the objectives on long and short term that are looked after in all five domains that have an impact on the environment.

By durable development or durable way of life it is understood an assembly of general assembly of human activities, taken into consideration in their dynamic form, also the biosphere in its own dynamic form. These relations have to allow the continuity of human life, to allow the satisfaction of each individuals own needs and also the development of the variety of cultures but in such a way in which the bio-physical context is not harmed:

The situation regarding the environment protection and durable development is one of great actuality and importance (Comelian 1994). The definition of the durable development concept has to be correlated with two basic concepts:

- the protection capacity that the planet has characterized by an exact natural rhythm, a complex bio-physical and biochemical dynamic and by other certain characteristics (of the territory, of the absorption, of the biological type etc.), by which is defined a system in which the individual lives like in a closed system.

- the durable programming has to be associated with the social programs of economical, technical, social development following objectives compatible with the ecologic succession. In such a way as to guaranty the satisfaction of day to day needs without compromising the future generations.

Conference was also adopted, the objective of the conference was to adopt a mandatory text (with legal force) on forest and desert protection. However finally, only a soft law document, therefore lacking mandatory effect, was adopted regarding the protection of forest - **Statement of principles for the Sustainable Management of Forests.**

Environmental protection problems are a challenge for which there is no single policy, but the combination of existing opportunities and increase of efficiency in all social and economic areas of states would contribute to solving the problem of resources and distribution. Environmental protection is currently a principal area of co-operation and international regulations which assumes a global or across borders dimension. The persistence, purpose and inter-temporal nature of environmental problems, call for global actions of prevention.

- Vishva Vadukar.
